1) Rates are shown per 100,000 persons. Rates for 2013 were calculated using census estimates for 2013, 2014 was calculated using census estimates for 2014, 2015 and 2016 rates were calculated using census estimates for 2015.  
2) Total hepatitis equals all hepatitis C cases, both "acute" and "past or present" for 2013, 2014 and 2015 and both "acute" and "chronic" for 2016.

3) Cases are included in Other race category if multiple races were chosen or if the case did not fit into any of the listed categories.

4) Increase in 2016 HCV cases partly due to a change in case definition.

Small numbers are unstable and should be interpreted with caution.

Provisional data. Numbers are subject to change when additional information is gained.
