

News and Announcements for December 2016

IPHIS Outage December 20th

Please be aware that there will be some system downtime from 7:00 AM to approximately 10:00 AM on the morning of December 20th as a result of updates being made to our Integrated Perinatal Health Information System (IPHIS). External partners will receive an email notification on December 20th if the outage is expected to last longer beyond 10:00 AM. **Further information about the enhancements coming to IPHIS in January 2017 will be available on the Stakeholder Support Site after the December 20th update.**

Year-End Cleanup

As we do every year, the Bureau of Vital Statistics encourages funeral homes, coroners, birth facilities, and local Vital Statistics staff to check their work queues in IPHIS/EDRS for outstanding unfiled/unregistered records.
