

LEADING CAUSES OF SUMMER INJURY – DROWNING

Ohio Data

- On average, 35 Ohio children and youth aged 1 to 19 drown each year.¹
- Drowning deaths among Ohio youth increase 131 percent in the summer months (May – August) over the average annual monthly rate. Three out of four (77 percent) drowning deaths among Ohio youth occur in the summer months.¹
- While children can drown in water anywhere, young children (aged 1 to 9) are at greater risk of drowning in swimming pools while older youth (aged 10 to 19) are at greater risk of drowning in natural bodies of water.²

Unintentional drowning deaths for ages 1-19

Drowning Prevention for Parents and Caregivers - Put Water Safety First¹

We all want to help our children live to their full potential and keep them safe and secure. Thankfully, parents can play a key role in protecting the children they love from drowning. Here are some good first steps to prevent drowning:

- **Fence it off.** Install a four-sided isolation fence, with self-closing and self-latching gates, around backyard swimming pools. This can help keep children away from the area when a parent cannot supervise them. Pool fences should completely separate the house and play area from the pool. If children can gain access to pools through the house or poorly-latched gates, they are at risk of drowning. Installing and properly using this type of fence could prevent 50 percent to 90 percent of swimming pool drowning and near drowning of children.² Door alarms, pool alarms and

automatic pool covers can add an extra layer of protection when used properly, but should not replace a fence and good supervision.

- **Make life jackets a "must."** Make sure all kids wear life jackets (also known as personal flotation devices or PFDs) in and around natural bodies of water, such as lakes, rivers and ponds, even if they know how to swim. *Ohio law requires children under the age of 10 to wear a PFD at all times on boats under 18 feet long, however older children will be safest when they wear PFDs too.*

Child PFD Requirements (Ohio Revised Code 1547.24)

No person shall operate or permit to be operated any vessel under 18 feet long with a child less than 10 years of age on board unless the child is wearing a PFD.

The PFD must be:

- U.S. Coast Guard approved Type I, II, III, or V;
 - In good and serviceable condition;
 - Of appropriate size;
 - Securely attached.
- **Learn CPR.** Learn cardiopulmonary resuscitation (CPR) and get recertified every two years. Immediate CPR can help a child stay alive and reduce the chance of brain damage.
 - **Be on the look out.** Supervise young children at all times around bathtubs, swimming pools, ponds, lakes, and other bodies of water. Start a "Water Watchers" program at backyard pools. See the [Safe Kids USA](http://www.usa.safekids.org) http://www.usa.safekids.org/tier3_cd.cfm?folder_id=300&content_item_id=24871 website for more information. Although many parents think that they would hear their child splashing or shouting for help, most drowning are silent, and can occur in seconds.
 - To avoid drain entanglement and entrapment in pools and spas, install anti-entrapment drain covers and safety vacuum release systems.
 - Begin teaching children to swim after age 4.
