* Non-reportable conditions for which the Ohio Department of Health receives frequent inquiries for information or are of special interest may be found in [Section 6](#).

^ HIV/AIDS reporting requirements are described in Chapter [3701-3-12](#).

** Reportable when due to a specific organism, to be reported as the etiologic agent, e.g., *Chlamydia trachomatis* or *Neisseria gonorrhoeae*.

Note: As of July 2011, methicillin-resistant *Staphylococcus aureus* infections are not individually reportable under the OAC, but outbreaks of these infections are reportable and the local/state health departments should be notified.

Note: Some fact sheets in the IDCM have been adapted from materials published by the Centers for Disease Control and Prevention and the New York State Health Department.
