Subject: Recall Announcement (ODA/ODH) 2003-36

Date: August 5, 2003

Minnesota Firm Recalls Ground Beef Products for Possible *E. coli* O157:H7

Howard Beef Processors, doing business as Ellison Farms, a Pipestone, Minn., establishment, is voluntarily recalling approximately 194,700 pounds of frozen ground beef products that may be contaminated with *E. coli* O157:H7, the U.S. Department of Agriculture's Food Safety and Inspection Service announced today.

The products subject to recall bear the establishment code "EST. 8934" inside the USDA mark of inspection. The products were produced on various days between May 30 and June 11, 2003 and distributed to consumers at retail outlets and through door-to-door sales nationwide. Some of the recalled products were also exported to Mexico.

The recall was initiated because epidemiological case studies suggest that the recalled product may be linked to two *E. coli* O157:H7 illnesses in Colorado.

FSIS is conducting laboratory tests to determine if the recalled products are linked to these cases. Anyone concerned about an illness should contact a physician.

E. coli O157:H7 is a potentially deadly bacteria that can cause bloody diarrhea and dehydration. The very young, seniors and persons with compromised immune systems are the most susceptible to foodborne illness.

Media with questions about the recall may contact Alan Sheldon, company media representative, at (507) 825-5486. Consumers with questions about the recall may contact Diane Hamersma, company customer service representative, at (800) 582-5284.

PREPARING GROUND BEEF FOR SAFE CONSUMPTION

USDA Meat and
Poultry Hotline
1-800-535-4555 or
visit
www.fsis.usda.gov

Although the product being recalled should be returned to the place of purchase, consumers preparing other ground beef products should heed the following advice.

Consumers should only eat ground beef patties that have been cooked to a safe temperature of 160 °F. When a ground beef patty is cooked to 160 °F throughout, it can be safe and juicy, regardless of color.

The only way to be sure a ground beef patty is cooked to a high enough temperature to kill

Consumers with other food safety questions can phone the toll-free USDA Meat and Poultry Hotline at 1-800-535-4555. The hotline is available in English and Spanish and can be reached from 10 a.m. to 4 p.m. (Eastern Time), Monday through Friday. Recorded food safety messages are available 24 hours a day.

The products are subject to recall are:

- "2227725600, DIST. BY: A CUT ABOVE, COLORADO SPRINGS, CO 80915, USDA CHOICE CHOPPED BEEF STEAKS HOMESTYLE, 18 PCS. NET WT. 6.0 LBS, 00263."

harmful bacteria is to use an accurate digital instant-read thermometer.

Color is not a reliable indicator that ground beef patties have been cooked to a temperature high enough to kill harmful bacteria such as *E. coli* O157:H7.

Eating a pink or red ground beef patty without first verifying that the safe temperature of 160 °F has been reached is a significant risk factor for foodborne illness.

Thermometer use to ensure proper cooking temperature is especially important for those who cook or serve ground beef patties to people most at risk for foodborne illness because *E. coli* O157:H7 can lead to serious illness or even death. Those most at risk include young children, the elderly, and those with compromised immune systems.
