3920	Federal Public Health Programs

OVERALL ACTIVITIES COVERED BY FUNDS SOURCE:

The Ohio Department of Health (ODH) Immunization Program plans to fund the Ohio American Academy of Pediatrics to develop and coordinate a program to educate physician offices that provide immunizations to pediatric patients. The name of the program is Maximizing Office Based Immunization or MOBI. The goal is to improve the rates of vaccines administered on-time, with the result lowering the occurrence of vaccine-preventable diseases among Ohio's pediatric population.

MOBI works to improve immunization rates through increased education to physician offices that provide immunizations to pediatric patients. MOBI will equip and enable local health districts to provide at least 350 high quality MOBI peer-to-peer programs to Ohio private practices during the grant period.

REVIEW CRITERIA USED FOR SELECTION:

The 2009 MOBI grant application was a non-competitive grant application beginning January 1, 2009 and ending December 31, 2009. The application was evaluated based on the Application Review Form on page 16.

The 2009 MOBI applications was scored by two independent reviewers from the Immunization Program workforce. The score was very good.
