

# Community Health Improvement Services

The following report is provided based on Ohio Revised Code §3701.981 which requires all tax-exempt hospitals to submit their IRS Form Schedule H to the Ohio Department of Health by July 1 annually. Additionally, hospitals were required in 2017 to submit current Community Health Needs Assessment and Implementation Strategies.

The Schedule H provided in 2017 is for the 2015 tax year and is compared to the 2011 national average due to a lag in nationally available data.

For additional information about a hospital's community benefit expenditures or community activities, see the Schedule H, Community Health Needs Assessment, or Implementation Plan available on the Ohio Department of Health's website or visit the hospitals website.
