

Eligibility

The Ohio Metabolic Formula Program will pay for metabolic formula for Ohio infants not eligible for Ohio Medicaid, born with the following disorders:

Argininemia

Argininosuccinic Acidemia

Carnitine Palmitoyl Transferase Deficiency Type II

Citrullinemia

Glutaric Acidemia Type I

Glutaric Acidemia Type II

Homocystinuria

3-Hydroxy-3-Methylglutaryl-CoA Lyase Deficiency

Hypermethioninemia

Isovaleric Acidemia

Long Chain Hydroxyacyl-CoA Dehydrogenase Deficiency

Maple Syrup Urine Disease (MSUD)

Medium Chain Acyl-CoA Dehydrogenase Deficiency (MCADD)

2-Methylbutyryl-CoA Dehydrogenase Deficiency

3-Methylcrotonyl-CoA Carboxylase Deficiency

Methylmalonic Acidemia

Phenylketonuria (PKU)

Propionic Acidemia

Short Chain Acyl-CoA Dehydrogenase Deficiency

Trifunctional Protein Deficiency

Tyrosinemia Type I, II and III

Very Long Chain Acyl-CoA Dehydrogenase Deficiency

What are the requirements for participating in the Metabolic Formula Program?

To participate in the metabolic formula program, an individual must:

- Be a resident of the state of Ohio
- Not be eligible for Ohio Medicaid*
- Receive care for PKU or another specified metabolic disorder at an approved Ohio center
- Apply annually to the Bureau for Children with Medical Handicaps (BCMh) Treatment Program if under 21 years of age
- Consume the metabolic formula as directed by the metabolic dietitian

If the above conditions are met, the family will be provided with all of the required metabolic formula at no cost.

*For individuals eligible for Ohio Medicaid, the Medicaid program will cover the cost of their metabolic formula. Contact Medicaid directly for assistance.
