

UPCOMING TRAININGS AND WEBINARS: Program staff at ODH are continuing to work with local health districts, the Operator Training Committee of Ohio (OTCO) and other experts to schedule training on different sewage treatment systems topics.

All recorded webinars will be archived and available on the web. Below is the list of training events scheduled to date and the WEBINAR Links to these presentations, as well as archives of past webinars.

To connect to the live webinars: Click on the link under the Notes section of the table, the link will only become active about 30 minutes prior to start of the presentation. At that point anyone who clicks on the link will see a video window that displays the ODH logo and a PowerPoint window that displays the first slide of the presentation. You should also hear music that plays prior to the start of the presentation, which will allow you to adjust your audio to a comfortable level. Please note that all webinars must be viewed using Internet Explorer as your web browser. We have been advised the software used to produce the webinar series is not compatible with other browsers (i.e. Firefox, Chrome, Safari, etc).

To connect to the archives of the recorded webinars: Click on the link under the Notes section of the table for the webinar you would like to view. Please note that all webinars must be viewed using Internet Explorer as your web browser. We have been advised the software used to produce the webinar series is not compatible with other browsers (i.e. Firefox, Chrome, Safari, etc).
