

Fact Sheet

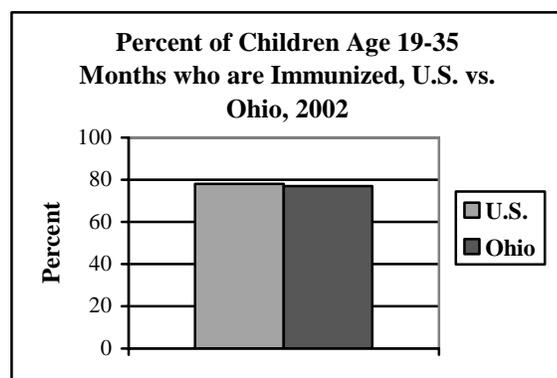

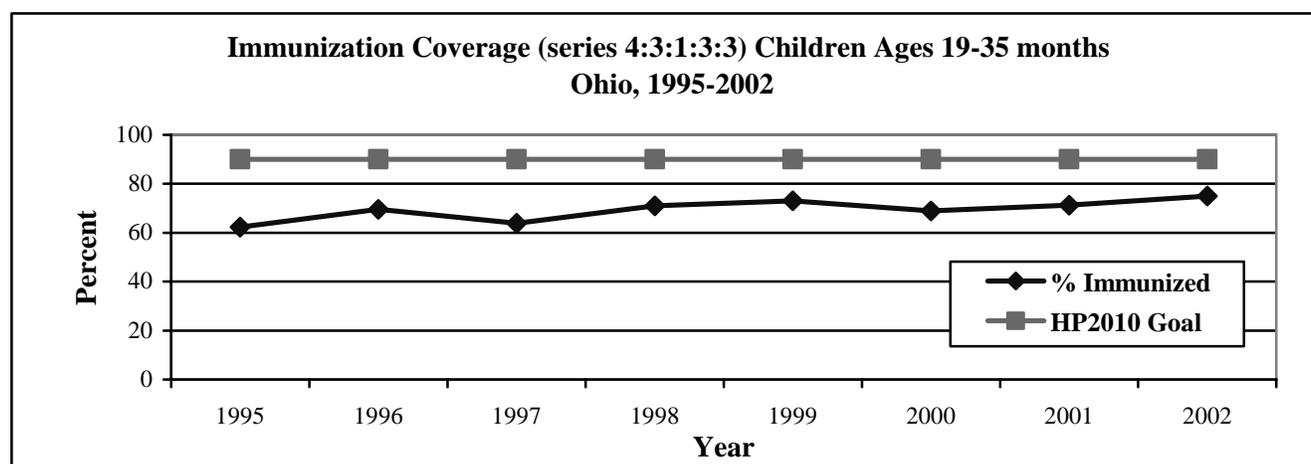

Maternal and Child Health Block Grant Core Performance Measure 7

The percent of 19-35-month-olds who have received the full schedule of age-appropriate immunizations against measles, mumps, rubella, polio, diphtheria, tetanus, pertussis, H. influenza and hepatitis B.

Immunization Coverage Series 4:3:1:3:3 Ohio, 1995-2002

HP 2010 Target <90>								
	1995	1996	1997	1998	1999	2000	2001	2002
Ohio	62.3	69.5	63.9	71.0	73.0	68.9	71.2	75.0
Measure Targets		72.0	75.0	78.0	82.0	85.0	85.0	75.0

Data Source: State Immunization Registry, National Immunization Survey (NIS), CDC, NCHS and National Immunization Program (NIP); State Vital Records and Bureau of Census population estimates.

Definitions: 4:3:1:3:3 For the purpose of this dataset, immunized children are those who receive four or more doses of diphtheria, tetanus and pertussis, three or more doses of poliovirus vaccine, one or more doses of any measles containing vaccine (MCV), three or more doses of Haemophilus Influenza type B (Hib), and three or more doses of hepatitis B vaccine (HepB).

Sources: Estimated Vaccination Coverage with Individual Vaccines and Selected Vaccination Series Among Children 19-35 Months of Age by State -- U.S., National Immunization Survey, Q1-Q4/2002. National Immunization Program, Centers for Disease Control and Prevention.

Key Data Summary

- The percent of Ohio children age 19-35 months who were immunized increased from 62.3 in 1995 to 75.0 in 2002.
- Data from 1998 – 2002 were generated from National Immunization Survey Q1-Q4 Estimated Vaccination Coverage with 4:3:1:3:3 Series.

HP 2010 Goal

- Increase the proportion of young children who receive all vaccines that have been recommended for universal administration for at least five years. Increase the proportion of children aged 19 to 35 months who received all recommended vaccines to 90 percent.

U.S./Ohio Comparison

- U.S.: 77.5 percent of children age 19-35 months received all recommended vaccines in 2002.
- Ohio: 75.0 percent of children age 19-35 months received all recommended vaccines in 2002.
- Ohio ranks 34th among the 50 states in vaccination coverage in 2002.
