## Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH1900012	Ansonia Village PWS	1,145	Natural	0.83		
OH1900112	Arcanum Village PWS	2,076	Deficient	0.42		
OH1900212	Bradford Village PWS	2,000	Deficient	0.65		
OH1900512	Gettysburg Village PWS	558	Deficient	0.74		
OH1900714	Greenville City PWS	13,200	Deficient	<0.20		
OH1900812	A And R Union City Park MHP PWS	110	Natural	1.09		
OH1900912	New Madison Village PWS	873	Deficient	0.45		
OH1901012	Stateline Agri Inc PWS	104	Deficient	0.50		
OH1901112	Sherwood Forest MHP PWS	578	Deficient	0.60		
OH1901212	Union City Village PWS	1,737	Natural	0.92		
OH1901312	Versailles Village PWS	2,569	Deficient	0.31		

### How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.  
**Deficient:** The natural fluoride level is below the optimum level for good dental health.  
**Natural:** The fluoride level is naturally at optimum or higher levels.  
**Purchase:** The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

## Ohio Public Water System Fluoride Levels, 2012

**Please Note:**

\*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

\*\*Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

*The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.*
