

Greene County

Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH2900212	Bowersville Village PWS	360	Natural	2.43		
OH2900612	Fairborn Public Water System	33,000	Adjusted			
OH2900803	Greene County - Day	997	Purchase		OH5703512	Dayton Public Water System
OH2901112	Bellbrook Water Works	9,491	Adjusted			
OH2901712	Jamestown Village PWS	1,917	Natural	1.04		
OH2901812	Maple Grove Mobile Home	52	Deficient	<0.20		
OH2901912	Central State University	2,051	Deficient	0.48	OH2902812	Xenia City PWS
OH2902012	Wright State University	18,104	Deficient	0.70		
OH2902422	Spring Valley Village	538	Deficient	0.15		
OH2902512	Spring Valley Estates MHP	300	Deficient	0.37		
OH2902812	Xenia City PWS	26,000	Deficient	0.23		
OH2903012	Yellow Springs Village PWS	3,761	Deficient	<0.20		
OH2903312	Wright-Patterson Afb Area B PWS	10,928	Adjusted			
OH2903412	Wright-Patterson Afb Area A PWS	11,791	Adjusted			
OH2903512	Greene Co.-Northwest Reg Water	36,785	Adjusted			
OH2903612	Cedarville University	3,600	Deficient	0.34		
OH2903912	Greene Co.-Southwest Reg Water	745	Deficient	<0.20		
OH2904103	Greene County - Swigart PWS	275	Purchase		OH5701315	Montgomery County Water System 1 PW
OH2904203	Greene County - Clio PWS	580	Purchase		OH5701315	Montgomery County Water System 1 PW
OH2905003	Greene County - Kittridge	271	Purchase		OH5703512	Dayton Public Water System
OH2906103	Greene County Eastern Regional PWS^	4,800	Adjusted		OH2902812	Xenia City PWS
OH2956203	Greene County - Fairborn	106	Purchase		OH2900612	Fairborn Public Water System

^ Green County Eastern Regional purchases non-fluoridated water from Xenia then adjusts to optimum fluoride levels.

Greene County

Ohio Public Water System Fluoride Levels, 2012

How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.
Deficient: The natural fluoride level is below the optimum level for good dental health.
Natural: The fluoride level is naturally at optimum or higher levels.
Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
