What is Racism?

“The variable “race” is not a biological construct that reflects innate differences, but a social construct that precisely captures the impacts of racism. For this reason, some investigators now hypothesize that race-associated differences in health outcomes are in fact due to the effects of racism,” (Jones, CP. Levels of Racism: A Theoretic Framework and A Garden’s Tale. American Journal of Public Health. 2000: 1212-1215), or http://1.usa.gov/PreventingInfantMortalityinOhio
