Ohio BCCP may approve additional codes with "Pre-approval". Codes will be paid at the current Medicare Part B rates.

## END NOTES

1	All consultations should be billed through the standard “new patient” office visit CPT codes 99201–99205. Consultations billed as 99204 or 99205 must meet the criteria for these codes. These codes (99204–99205) are typically not appropriate for NBCCEDP screening visits.
2	The type and duration of office visits should be appropriate to the level of care needed to accomplish screening and diagnostic follow-up within the NBCCEDP. Reimbursement rates should not exceed those published by Medicare. While some programs may need to use 993XX-series codes, 993XX Preventive Medicine Evaluation visits are not appropriate for the NBCCEDP. 9938X codes shall be reimbursed at or below the 99203 rate, and 9939X codes shall be reimbursed at or below the 99213 rate.
3	Medicare’s methodology for the payment of anesthesia services are outlined in chapter 12 of the Medicare Claims Processing Manual at <a href="http://www.cms.hhs.gov/manuals/downloads/clm104c12.pdf">www.cms.hhs.gov/manuals/downloads/clm104c12.pdf</a> . The carrier-specific Medicare anesthesia conversion rates are available at <a href="http://www.cms.hhs.gov/center/anesth.asp">www.cms.hhs.gov/center/anesth.asp</a> . Modifiers: Split billing between Physician and Nurse allowed with modifiers QK, QY or AD for physician and modifier QX for nurse.
4	These procedures may be reimbursed at their own Medicare rates.
5	HPV DNA testing is a reimbursable procedure if used for screening in conjunction with Pap testing or for follow-up of an abnormal Pap result or surveillance as per ASCCP guidelines. It is not reimbursable as a primary screening test for women of all ages or as an adjunctive screening test to the Pap for women under 30 years of age. Providers should specify the high-risk HPV DNA panel only. Reimbursement of screening for low-risk HPV types is not permitted.  The CDC will allow for reimbursement of Cervista HPV HR at the same rate as the Digene Hybrid-Capture 2 HPV DNA Assay.  <b>CDC Funds may be used for reimbursement of HPV genotyping.</b>
6	A LEEP or conization of the cervix, as a diagnostic procedure, may be reimbursed based on ASCCP recommendations. Grantees are strongly encouraged to develop policies to closely monitor these procedures and should pre-authorize this service for reimbursement on an individual basis.
7	This charge should be used with caution to ensure that programs do not reimburse for supplies, the cost of which, has already been accounted for in another clinical charge.
8	Breast MRI can be reimbursed by the NBCCEDP in conjunction with a mammogram when a client has a BRCA mutation, a first-degree relative who is a BRCA carrier, or a lifetime risk of 20-25% or greater as defined by risk assessment models such as BRCAPro that are largely dependent on family history. Breast MRI can also be used to better assess areas of concern on a mammogram or for evaluation of a client with a past history of breast cancer after completing treatment. Breast MRI should never be done alone as a breast cancer screening tool. Breast MRI cannot be reimbursed for by the NBCCEDP to assess the extent of disease in a woman who is already diagnosed with breast cancer.
9	Codes 19081-19086 are to be used for breast biopsies that include image guidance, placement of localization device, and imaging of specimen. These codes should <b>not</b> be used in conjunction with 19281-19288.
10	Codes 19281-19288 are for image guidance placement of localization device without image-guided biopsy. These codes should <b>not</b> be used in conjunction with 19081-19086.
11	Facility price is the rate paid to the physician when a procedure is performed in a facility (includes hospitals and ambulatory surgical centers – ASC). The Non-facility price is the amount paid to the physician when the procedure is performed in the office. Hospitals and ASC’s rate is the difference between the Facility price and non-facility price and can be paid to the facility.
12	Pre-Operative Testing must be medically necessary for a planned surgical procedure (CPT CODE) covered by BCCP.
13	Electrocardiogram (ECG) Codes: 93000 cannot be billed along with 93005 or 93010.
14	<b>List separately in addition to code for primary procedure G0202.</b>
15	<b>List separately in addition to G0204 or G0206.</b>
16	<b>Due to Medicare claims processing issues, CMS will not be able to process the new CPT Codes. Therefore the rates will be generated using Ohio Medicaid Rates for these CPT Codes.</b>
