

Create and **Support**
the **foundation** for
HEALTH

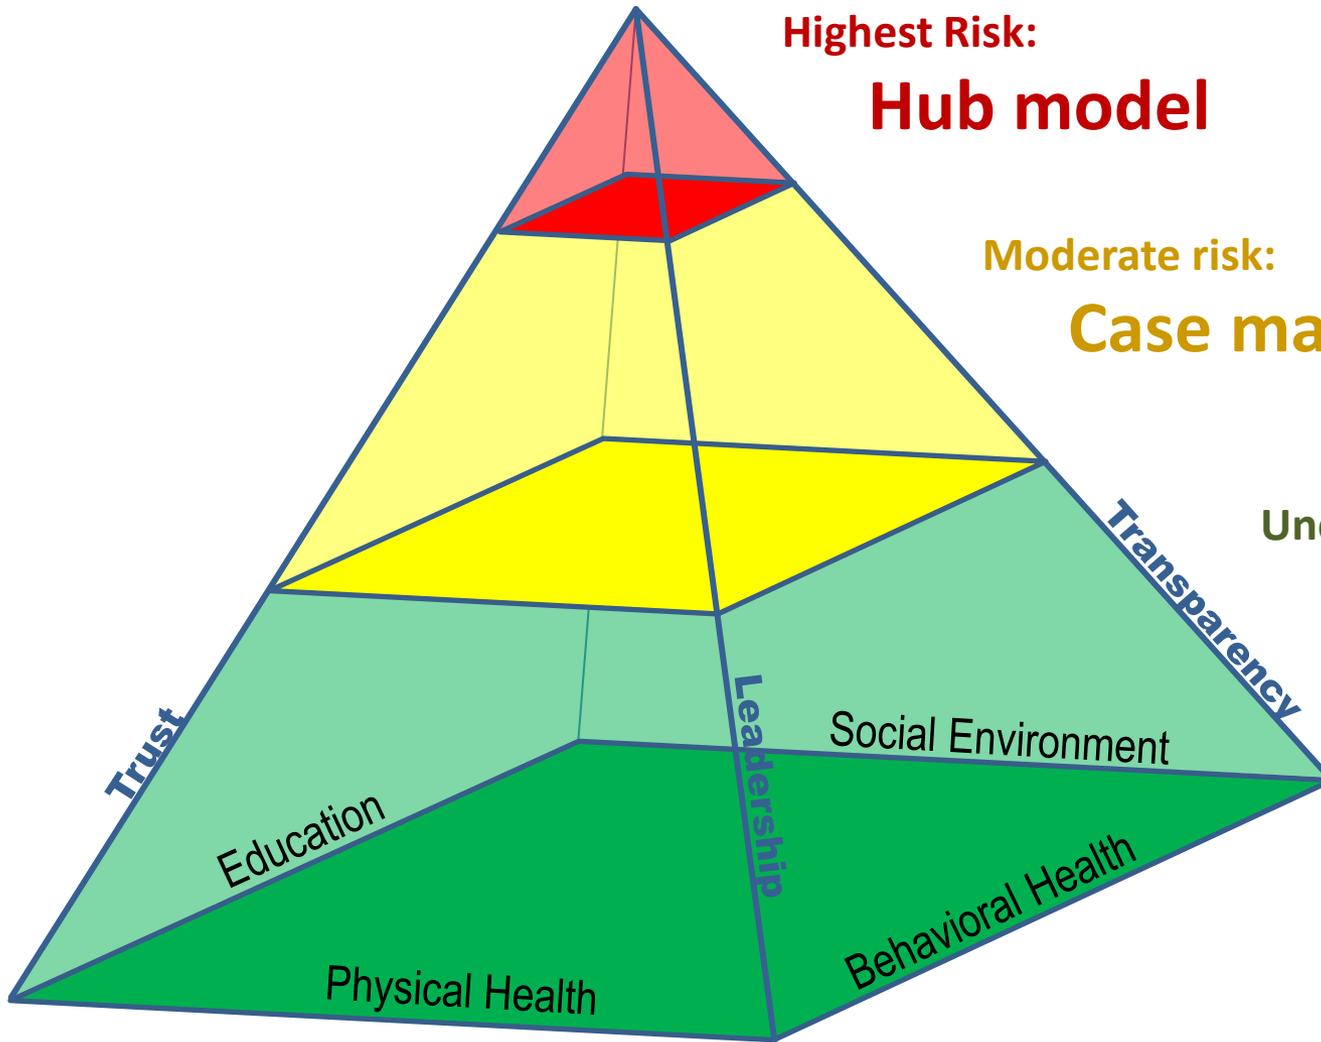

Even with good foundations, there are still those at risk,
and others experiencing poor health

These groups need
More than routine preventive care

Support them with a
Framework
Of trust
Transparency
And Leadership

Highest Risk:

Hub model

Moderate risk:

Case management

Uncomplicated cases:

Wellness care

Trust

Education

Physical Health

Leadership

Social Environment

Behavioral Health

Improving Care Management: Medicaid Managed Care

- Ohio Medicaid redesigned the care management program for its health plans
- Targets vulnerable, high risk consumers and offers a more hands-on approach to coordinating care
- Features of the new program:
 - Use of a team of health professionals to manage care
 - Addresses clinical and non-clinical needs to ensure holistic approach to coordinating care for the consumer
 - Promotes a staffing ratio (1 FTE: 25 consumers) that allows the plan to interact with consumers at an increased level of intensity
 - Increases contact with the consumer, starting with a face to face visit each quarter. Ideally the visit occurs at the point of care.
