

Decision Guide for CDC Consultation and Ebola Virus Disease (EVD) Testing

Does patient meet **ANY** of the following within 21 days before symptom onset?

Testing Indicated:
Call ODH 24/7 (614-722-7221) for consultation and approval

Optional Test, by clinical decision if no other diagnosis identified:
Call ODH 24/7 (614-722-7221) for consultation if questions

Testing not Indicated:
See Monitoring and Movement Guidance for additional restrictions

Other Symptoms Include:

- Intense weakness
- Headache and sore throat
- Internal or external bleeding
- Impaired kidney and liver function
- Muscle pain
- Vomiting
- Diarrhea

Abnormal Blood Work:

- Platelet count <150K
- Prolonged PT/PTT
- AST/ALT elevation

DEFINITIONS:

Fever:
• Defined as ≥ 100.4 (38.0°C)

Specimens received at CDC without prior consultation will not be tested. Testing may be delayed if tracking information is not provided.

Note: Malaria diagnostics should be a part of initial testing because it is the most common cause of febrile illness in persons with a travel history to the affected countries.

* Outbreak updates and affected countries found at: <http://www.cdc.gov/vhf/ebola/outbreaks/guinea/index.html>
** Case definitions can be found here: <http://www.cdc.gov/vhf/ebola/hcp/case-definition.html>

+Special thanks to the Michigan Department of Community Health for their work on the decision guide
