

## 2. Program Information

The contact person in each Local Health Department (LHD) needs to complete a contact form (appendix/ attachments) each year and update it with any changes made within that year. This needs to be faxed or e-mailed to Ohio Department of Health (ODH) as instructed on the form. The form will be mailed or e-mailed to the LHD contact each year for updates.

All new cases, including new pregnancies for existing cases, need be reported to the LDH Perinatal Hepatitis B Program (PHBPP). Case closures also need to be reported by e-mail, fax or phone call. This report needs to include the ODRS case number and a brief explanation, such as opened, closed, or any other information or questions the contact person may have for the PHBPP nurse consultant.

For any questions regarding the use of ODRS or the Pregnancy Module in ODRS, please go to the "ODRS Training Manual for Perinatal Hepatitis B Case Management" (in the HELP section of ODRS). "This manual is to provide an overview of ODRS functionality for case management for prenatal and infant hepatitis B cases. It includes information related to the follow up of hepatitis B carrier women during pregnancy and their household and sexual contacts. Additionally the system monitors the status and care of infants after delivery. ODRS is a person-based system and monitors cases at the state and jurisdictional levels. In order to get started, users must have access to ODRS through the ODH Gateway. Access to ODRS can be obtained through your ODRS LHD administrator." (ODRS Training Manual for Perinatal Hepatitis B Case Management, June 2010, Chapter 1, page 2) If you have any additional questions, or need assistance, you can contact the ODH Help Desk at (614) 752-5190. For specific questions about setting up queues or queries, contact Tammy Shriver at (614) 728-4711.

The LDH PHBPP nurse sends the "Ohio Impact SIIS" brochure (appendix/attachments) to the parent/guardian of the high risk newborn. This is considered notification for use of the Impact Statewide Immunization Information System (SIIS). If the parent/guardian calls the nurse to express their desire not to be involved in the registry, the nurse will notify ODH. Otherwise, the Hepatitis B Immune Globulin (HBIG) and 1st dose of Hepatitis B vaccine (HBV) will be added to the registry as historical data.

The ODH PHBPP will provide the following brochure (copy in appendix/attachments):

- "Hepatitis B and Moms-to-Be" brochure for use with positive Hep B clients and medical providers, from the Asian Liver Center at Stanford

University at <http://liver.stanford.edu/Public/brochures.html> (Also available in seven foreign languages)

*This brochure may be ordered through the PHBPP nurse consultant by e-mail or phone, or directly from the Asian Liver Center.*

The ODH Immunization unit will provide the following materials:

- "All Kids Need Hepatitis B Shots!" brochure, ODH 0657.11 (Rev. 09/10)
- "Immunization Record", 3816.11
- "Impact SIIS" brochure ODH 3945.11 (Rev.11/11)

*These three immunization unit materials must be ordered with the included order form (appendix/attachments) from the Immunization unit.*

CDC brochures on Hepatitis B and Pregnancy can be ordered from the CDC web site <http://wwwn.cdc.gov/pubs/hepa.aspx>

More information, including materials in foreign languages, can be ordered from [www.immunize.org](http://www.immunize.org)
