

## VACCINE ORDERING INFORMATION

When you need PHBPP Hepatitis B vaccine for a contact of one of our mothers and/or babies please use the following procedure to order it:

1. Go through whoever does your vaccine ordering/management, the vaccine will need to be ordered electronically through SIIS – paper order forms are no longer accepted.
2. Ask them to order Engerix or Recombivax – whichever formulation you prefer – 1 box of 10 doses.
3. On the next line ask them to enter this comment: **Please enter this order as “ADULT VACCINE for Perinatal Hep B Program”** (Otherwise you will get pediatric vaccine).
4. If you need pediatric vaccine for a little one in the household of a case just select the formulation you want and enter the comment on the next line **“For Perinatal Hep B Program Child”**

**\*\*\*Adult hepatitis B vaccine may be ordered with VFC vaccine (submitted on the same order). Just make sure to specify that the vaccine is for adult contacts of an infant in the PHBPP.**
