

TABLE 12

INDUCED ABORTIONS IN OHIO WITH POST-ABORTION COMPLICATIONS, BY TYPE OF COMPLICATION
AND TERMINATION METHOD, 2001

Termination Method	Complication Type								Total Complications	Abortions w/ One or More Complications
	Hemorrhage	Perforation of Uterus	Cervical Laceration	Infection	Incomplete Abortion	Failed Abortion	Hematometra	Other		
A. Suction Curettage	4	2	5	1	2	2	0	2	18	15
B. Sharp Curettage	0	0	1	0	0	0	0	0	1	1
C. Dilation & Extraction	0	1	0	0	0	0	0	0	1	1
D. Dilation & Evacuation	5	2	1	1	0	1	0	2	12	10
E. Saline/Urea Instillation	0	0	0	0	0	0	0	0	0	0
F. Prostaglandin Instill.	0	0	0	0	0	0	0	0	0	0
G. Hysterotomy	0	0	0	0	0	0	0	0	0	0
H. Hysterectomy	0	0	0	0	0	0	0	0	0	0
I. Other/Unknown	0	0	0	0	0	0	0	1	1	1
J. Medical/Nonsurgical	0	0	0	0	1	0	0	0	1	1

Source: Confidential Abortion Reports. Numbers are comparable to Table 10b, but not Tables 10a and 11 because those tables are based on Post-Abortion Care Reports for Complications. Complications from the two data sources cannot be summed.

Note: One form reported a cervical laceration complication and two methods; the single complication is listed for both methods.
