Special Anaerobic Devices Approvals For Septic Tanks, Pretreatment Tanks, Dose Tanks and Trash Traps

The Ohio Department of Health has reviewed the information submitted as a special anaerobic device. The following tanks do not comply with the Ohio Administrative Code (OAC) Rule 3701-9-07 and could not be approved as conventional septic tanks for use in Ohio.

OAC Rule 3701-29-20 allows for household sewage disposal system components or household sewage disposal systems differing in design or principal of operation from those set forth in rules 3701-29-01 to 3701-29-21 of the Ohio Administrative Code to qualify for approval as a special device or system, if comprehensive test and investigations show any such component or system produces results equivalent to those obtained by sewage disposal components or systems complying with such regulations.

Based on the review of the submitted information, the Director of Ohio Department of Health approved the following trash traps/pump tanks or septic tanks as a special anaerobic sewage treatment device for use in Ohio.

Special devices are subject to Ohio Department of Health review for compliance with the conditions of approval and applicable law and rules. A special device may be reevaluated at any time when there is evidence of noncompliance with approval conditions or for other reasons deemed necessary to assure compliance. Upon review, if there is a determination of noncompliance, a special device or the manufacturer may be removed from the approved list in accordance with Chapter 119 of the Ohio Revised Code.

Manufacturer	Date of Approval	Approved Tank Size or function
<u>Norwesco</u> P.O. Box 439 St. Bonifacius, Mn 55378-0439 1-800-446-8817	October 2008	750 gallon Bruiser Tank Pre-treat, dose or trash trap
