ODH APPROVED RADON LABORATORIES AND TRAINING COURSES

ODH recommends the use of an Ohio Approved Radon Laboratory for obtaining devices and for the analysis of those devices. Contact the Radon Licensing Program at 614-752-4425 for current information about finding a licensed radon tester, an approved lab or training course information.

*The Ohio Administrative Code contains the rules for conducting radon measurements in Ohio for licensed individuals. If you wish to test your schools, it is good information to be familiar with whether conducting tests with your school personnel or with a licensed radon tester.
