Franklin County

Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH2503512	Rickenbacker Vicinity Water	1,500	Purchase		OH2504412	Columbus Public Water System
OH2503903	Lockbourne Village PWS	341	Purchase		OH2503512	Rickenbacker Vicinity Water
OH2504012	Jefferson Water And Sewer District PWS	8,733	Adjusted			
OH2504212	Mt Air Improvement Corp	110	Deficient	<0.10		
OH2504303	Obetz Satellite 1 PWS	195	Purchase		OH2504412	Columbus Public Water System
OH2504412	Columbus Public Water System	1,018,077	Adjusted			
OH2554603	Obetz Satellite 2 PWS	1,318	Purchase		OH2504412	Columbus Public Water System
OH2566512	Obetz Satellite 6 PWS	25	Purchase		OH2504412	Columbus Public Water System

^ Obetz Village PWS buys about half its water from Columbus Public Water System (OH2504412). Contact the water system to determine fluoride levels in the water your community receives.

How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.
Deficient: The natural fluoride level is below the optimum level for good dental health.
Natural: The fluoride level is naturally at optimum or higher levels.
Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
