

Hamilton County

Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH3100012	Addyston Village PWS	1,200	Deficient	<0.20		
OH3100112	Red Wood Mobile Home Park	100	Deficient	0.12		
OH3100512	Cleves Village PWS [^]	4,950	Adjusted			
OH3100612	Dry Fork MHP	198	Deficient	0.20		
OH3100712	Glendale Village PWS	2,200	Adjusted			
OH3100812	Harrison City PWS	9,887	Adjusted			
OH3101112	Indian Hill City PWS	15,000	Adjusted			
OH3101212	Lockland Village PWS ^{^^}	3,707	Deficient	<0.20		
OH3101703	Norwood City PWS	19,997	Purchase		OH3102612	Cincinnati Public Water System
OH3101812	Reading City PWS	11,292	Purchase		OH3102612	Cincinnati Public Water System
OH3102212	Wyoming City PWS	9,700	Adjusted			
OH3102303	Twin Rivers Water Corporation ^{^^^}	185	Deficient	0.00	OH5215009	Tri-Township Water Corp
OH3102612	Cincinnati Public Water System	829,727	Adjusted			

[^] Cleves Village occasionally purchases water from 3102612 (Cincinnati - Hamilton Co), which is fluoridated

^{^^} Lockland Village occasionally purchases water from 3102612 (Cincinnati - Hamilton Co), which is fluoridated

^{^^^} Twin Rivers buys from Tri-Township Water Corporation located in IN. This system is fluoride deficient.

How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.
Deficient: The natural fluoride level is below the optimum level for good dental health.

Natural: The fluoride level is naturally at optimum or higher levels.

Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Hamilton County

Ohio Public Water System Fluoride Levels, 2012

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
