

Muskingum County

Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH6000212	Dresden PWS	2,000	Deficient	0.13		
OH6000303	Dunfalls Association, Inc.	266	Purchase		OH6000412	Muskingum County Water - Se
OH6000412	Muskingum County Water - Se	10,528	Adjusted			
OH6000503	Muskingum County Water - Nw	10,251	Purchase		OH6002712	Zanesville PWS
OH6000612	Frazeysburg PWS	1,200	Deficient	0.30		
OH6001411	Maysville Regional Water	6,252	Adjusted			
OH6001711	New Concord PWS	2,840	Adjusted			
OH6001912	Philo	1,050	Deficient	0.50		
OH6002112	Roseville PWS	1,936	Deficient	0.11		
OH6002212	South Zanesville PWS	2,800	Natural	1.00		
OH6002512	Lewis Mobile Home Park	53	Deficient	0.26		
OH6002712	Zanesville PWS	35,600	Adjusted			
OH6002812	Mt Sterling Home Owners	162	Deficient	0.50		
OH6002903	Muskingum County Water - Home Acres	468	Purchase		OH6002712	Zanesville PWS

How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.
Deficient: The natural fluoride level is below the optimum level for good dental health.
Natural: The fluoride level is naturally at optimum or higher levels.
Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Muskingum County

Ohio Public Water System Fluoride Levels, 2012

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
