

Washington County

Ohio Public Water System Fluoride Levels, 2012

<u>PWS ID</u>	<u>Water System</u>	<u>Population Served</u>	<u>Fluoridation Status</u>	<u>Fluoride Level</u>	<u>Purchase From ID</u>	<u>Purchase From Name</u>
OH8400012	Belpre City PWS	6,660	Adjusted			
OH8400112	Beverly Village PWS	1,900	Deficient	<0.20		
OH8400212	Little Hocking Water/Sewer Association	12,256	Adjusted			
OH8400312	Lowell Village PWS	585	Deficient	<0.20		
OH8400412	Marietta City PWS	18,707	Adjusted			
OH8400512	Matamoras Village	957	Deficient	<0.20		
OH8400612	Newport Water/Sewer District PWS	1,663	Deficient	0.17		
OH8400712	Putnam Community Water Association PWS	2,634	Deficient	<0.20		
OH8401112	Waterford Water/Sewer Association	700	Deficient	<0.50		
OH8402503	Reno Water And Sewer 1	2,142	Purchase		OH8400412	Marietta City PWS
OH8402703	Warren Comm W And S Assn 2	6,230	Adjusted			
OH8402803	Reno Water And Sewer 2	1,520	Purchase		OH8400412	Marietta City PWS
OH8402903	Reno Water And Sewer - Kardex	446	Purchase		OH8400412	Marietta City PWS
OH8403112	Tri-County Rural W And S District	2,758	Deficient	<0.50		
OH8403203	Highland Ridge Water	3,416	Purchase		OH8402703	Warren Comm W&S Assn 2

How to use this table:

Adjusted: The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.

Deficient: The natural fluoride level is below the optimum level for good dental health.

Natural: The fluoride level is naturally at optimum or higher levels.

Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Washington County

Ohio Public Water System Fluoride Levels, 2012

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
