

3701-55-06 Required further screening if initial specimen collected at less than twenty-four hours.

- (A) If the initial specimen is collected from a child at less than twenty-four hours of age, the child's attending physician, certified nurse midwife, certified nurse practitioner or clinical nurse specialist and the hospital or freestanding birthing center shall make a reasonable effort to cause a repeat blood specimen to be collected from the child in accordance with the provisions of paragraph (B) of this rule.
- (B) The repeat blood specimen shall be collected after the child reaches twenty-four hours of age but no later than when the child reaches ten days of age.
- (C) A specimen collected under this rule shall be sent to the bureau of public health laboratory for screening no later than two business days after it is collected.
